

Nilesh Mali SOC

Analyst

nileshmali688@gmail.com | +1 (437) 239-5104 | Etobicoke, Canada | linkedin.com/in/nilesh-mali-845160225

Professional Summary

Proactive SOC Analyst with 3+ years of experience with monitoring, investigating, and responding to security incidents within enterprise environments. Successfully triaged and analyzed 2,000+ security alerts, bringing down false positives by 25% through SIEM rule optimization. Investigated and countered hundreds of phishing attempts, malware infections, and intrusion attempts, limiting possible business disruption. Collaborated with cross-functional teams to enhance incident response efficiency by 30% through better playbooks and incorporated threat intelligence. Experienced with utilizing SIEM (Splunk, ELK), IDS/IPS, EDR, and firewalls to secure mission-critical systems.

Key Skills

- **Security Monitoring & Response:** SIEM (Splunk, ELK Stack, Anrita), IDS/IPS (TippingPoint, McAfee), EDR (CrowdStrike, Tanium)
- **Threat Intelligence & Analysis:** Recorded Future, Anomali, IOC collection, malware analysis (Wireshark, McAfee ATD, Anyrun, Hybrid Analysis)
- **Network & Endpoint Security:** Fortigate, Meraki Firewalls, Symantec Endpoint, McAfee, Proofpoint, Symantec Email Security
- **Vulnerability Management:** Qualys scanning, remediation reporting
- **Process & Tools:** ServiceNow, Remedy Smart IT, incident response playbooks, SOC use case development
- **Core Competencies:** Threat detection, log analysis, SIEM fine-tuning, phishing analysis, incident reporting, cross-team collaboration

Professional Experience

SOC Analyst | ZeronSec Pvt. Ltd. Mar

2023 – Jul 2025 | Vadodara, India

Incident Detection & Response :

- Managed 5,000+ daily security incidents through SIEM and EDR solutions to ensure timely identification and real-time detection of threats.
- Triage and resolved 1,200+ security incidents, reducing incident response by 20% via playbooks with structure.
- Mapped and addressed 300+ phishing attacks and suspect emails to avoid credential theft and data breaches.
- Performed forensic log analysis through firewalls, IDS/IPS, and endpoints and identified root causes for severe alerts.
- Conducted malware analysis with Wireshark and sandbox tools, contributing to a reduction of false escalations by 15%.

Threat Intelligence & Security Engineering :

- Integrated 500+ IOCs from threat intelligence feeds (Recorded Future, Anomali) into SIEM to increase detection coverage.
- Refined and mature SOC use cases, with enhanced detection of lateral movement and brute-force attacks. Fine-tuned SIEM correlation rules, reducing false positives by 25%, so that analysts can concentrate on actual threats.
- Guaranteed ongoing health of security sensors, SIEM infrastructure, and EDR agents, with 99.9% uptime.

Reporting & Collaboration :

- Provided weekly and monthly SOC reports to senior management with incident trends and control effectiveness.
- Coordinated with IT and network groups to enhance firewall policies and patch cycles by 15% to decrease vulnerabilities.

Certifications

- EC-Council – Network Defense Essentials
- Executive Vulnerability Management
- Incident Response Lifecycle
- Enterprise Security Leadership
- World-Class Security Operations Center (SOC)

Education

- Bachelor in Computer Applications - India
November 2022
- Master in Computer Applications (Cyber Security) - Parul University, Vadodara, India
2021- 2023
- Post Graduate Certification Program in Cyber Security - George Brown College, Canada
Pursuing
