

Nilesh Mali

SOC Analyst | SIEM Investigation | Threat Detection | Incident Response

nileshmali688@gmail.com | GTA / Toronto, Canada | linkedin.com/in/nilesh-mali-845160225

Professional Summary

SOC Analyst with 3+ years of experience monitoring, investigating, and responding to security incidents across enterprise environments. Experienced in SIEM monitoring, alert triage, phishing investigation, IDS/IPS analysis, EDR review, firewall log analysis, vulnerability management, and incident response. Hands-on with Splunk, Elastic Stack/ELK, Sumo Logic, Microsoft Sentinel, CrowdStrike, Tanium, Wireshark, Qualys, and threat intelligence platforms. Focused on practical threat detection, false-positive reduction, incident documentation, and improving security monitoring workflows.

Core Skills

Security Monitoring & Response	SIEM monitoring, alert triage, incident response playbooks, SOC reporting, escalation notes
SIEM & Log Analysis	Splunk, Elastic Stack/ELK, Sumo Logic, Microsoft Sentinel, dashboarding, detection tuning
Threat Intelligence & Analysis	Recorded Future, Anomali, IOC collection, phishing analysis, malware triage, sandbox review
Network & Endpoint Security	IDS/IPS, firewall logs, EDR review, Windows Event Logs, Sysmon, Linux authentication logs
Vulnerability & Process Tools	Qualys, ServiceNow, Remedy Smart IT, reporting, remediation tracking, cross-team coordination

Professional Experience

SOC Analyst | ZeronSec Pvt. Ltd.

Mar 2023 - Jul 2025 | Vadodara, India

- Monitored and investigated high-volume SIEM and EDR alerts to support timely identification of suspicious activity and security incidents.
- Triageed phishing attempts, malware alerts, intrusion attempts, and suspicious endpoint/network events while documenting evidence and response actions.
- Performed forensic log analysis across firewalls, IDS/IPS, endpoints, and SIEM platforms to identify root cause and support escalation decisions.
- Used SIEM platforms including Splunk and Elastic Stack/ELK for searching, filtering, dashboard review, alert validation, and investigation workflows.
- Integrated and reviewed IOCs from threat intelligence feeds such as Recorded Future and Anomali to improve detection coverage.
- Fine-tuned SIEM correlation rules and detection logic to reduce false positives and improve analyst focus on higher-risk alerts.
- Prepared weekly and monthly SOC reports summarizing incident trends, control effectiveness, recurring patterns, and remediation follow-up.
- Collaborated with IT and network teams on firewall policy review, vulnerability remediation, patching cycles, and security control improvements.

Hands-On Security Projects

- **SOC Home Lab:** Built a practical SOC lab using OPNsense, Suricata, Kali Linux, Windows/Linux systems, and SIEM dashboards to detect scans, brute-force activity, firewall denies, and IDS alerts.
- **Windows Sysmon Detection Lab:** Investigated Windows Event IDs 4624, 4625, 4688, 4740 and Sysmon Event IDs 1, 5, and 11 for authentication and process activity.
- **Microsoft Sentinel Cloud SOC Lab:** Practiced Azure Log Analytics, Microsoft Sentinel, KQL queries, analytics rules, and cloud incident triage workflows.
- **Elastic Security Detection Lab:** Used Elastic Stack/ELK and Kibana to collect, search, visualize, and investigate security logs for SOC-style monitoring.

- **Python for SOC Automation:** Created small scripts for log parsing, IOC extraction, failed login counting, CSV conversion, and repetitive SOC task automation.

Certifications

- EC-Council - Network Defense Essentials
- Executive Vulnerability Management
- Incident Response Lifecycle
- Enterprise Security Leadership
- World-Class Security Operations Center (SOC)

Education

- Post Graduate Certification Program in Cyber Security - George Brown College, Canada | Pursuing
- Master in Computer Applications (Cyber Security) - Parul University, Vadodara, India | 2021 - 2023
- Bachelor in Computer Applications - India | 2022
